

SOCIAL JUSTICE RESEARCH—Volume 10, 1997

Published in association with the International Center for Social Justice Research, University of Potsdam, Germany, and the Grant Sawyer Center for Justice Studies, University of Nevada, Reno.

Social Justice Research is an international multidisciplinary forum for the publication of original papers that have implications of sufficient scope to be important to all social scientists investigating the origins, structures, and consequences of justice in human affairs. The journal encompasses the justice-related work (using traditional and novel approaches) of all social scientists—psychologists, sociologists, anthropologists, economists, policy scientists, political scientists, legal researchers, management scientists, and others. By its multidisciplinary approach, *Social Justice Research* hopes to further the integration of the various social science perspectives. In addition to original research papers—theoretical, empirical, and methodological—the journal also publishes book reviews and from time to time publishes special thematic issues.
